

11-13 June 2009 in Göteborg, Sweden

F I R S T A N N O U N C E M E N T

Conference Themes:

Bone conduction hearing

Bone conduction physiology
Bone conduction implants
Implantable transducers
Transcutaneous/Percutaneous transmission
Audiological preoperative assessment and indications
Surgical techniques for BAHA®
Fitting of BAHA®
BAHA® and single sided deafness
Audiological evaluation of BAHA®
BAHA® in children

Craniofacial osseointegration

30 year anniversary of bone anchored epistheses
Preoperative planning
Cancer rehabilitation
Osseointegration in compromised tissues
Rehabilitation of malformations
Osseointegration in children
Skin penetration in osseointegration
Follow-up and results

Conference overview

When: Thursday June 11 – Saturday 13, 2009

Where: Gothenburg, Sweden

Who: All professionals, academics and researchers working in the fields of bone conduction hearing and craniofacial osseointegration including audiologists, engineers, ENT, Plastic and Maxillofacial surgeons, Radiologists, Prosthodontists and Anaplastologists

Why: Identifying and exploring the future role of sound transmission via bone conduction and the future of craniofacial osseointegration

Format: Three day scientific programme of plenary lectures, abstract papers, poster session and workshops

The city of Göteborg

Göteborg is located on the Swedish west coast and is a convenient gateway to other scenic Nordic and European cities. Göteborg (Gothenburg) is the second largest city in Sweden. In an international yet distinct atmosphere, most preferences regarding day- and evening cultural engagement, sightseeing, quality cuisine and entertainment can be accommodated. Gothenburg is also an industrial centre, where companies such as Volvo, SKF, Hasselblad, AstraZeneca and others have headquarters or main offices. Göteborg University is known to engage many internationally leading scientists.

The Conference Centre is adjacent to the city centre, which is primarily characterised by "The Avenue". It is a long street that constitutes a natural meeting place for both tourists and the local population. At the end of The Avenue is the Museum of Arts, awarded three stars in the Michelin Museum Guide, and the main

Concert Hall of the Göteborg Symphony Orchestra. Walking along The Avenue, you will find a vibrating city life and a variety of large and small shops, quality restaurants with especially good seafood, theatres, pubs and more.

On the harbour bay shore, is the new Opera house. The harbour also offers the opportunity for long or short excursions on the sea and for unusual and beautiful sightseeing. For those who enjoy walking, or to visually absorb exceptional gardening, there are several fantastic parks in Göteborg, Trädgårdsföreningen is found right on The Avenue, Liseberg, Swedens largest Amusement Park and the professionally administered Botanic Society Garden are within five minutes by taxi.

We hope that you will enjoy our city, and also discover its characteristic friendly, "small-town" feeling.

GÖTEBORG UNIVERSITY

Gösta Grantröm

President

Department of Otolaryngology
Head and Neck Surgery
The Sahlgrenska Academy at Göteborg University
